

Plant Refurbishment

landfill systems

engineering a better environment

Landfill Systems provide complete or partial plant refurbishment services. Provide us with your requirements and we will provide the most cost effective solution.

No job is too big or too small, either electrical and / or mechanical.

We will decommission and dispose of your old equipment, ensuring minimal down time in the transition from old to new.

Contact us now for a free site visit to assess your existing equipment and to discuss your new requirements.

- Electrical systems
